Welcome to the **SQUARE (Software Quality Research)** group at the IT University of Copenhagen. We are dedicated to research on how to **improve the quality of software**.

The **SQUARE** group does research on **theory, methods, and tools** that improve the quality of Software:

- We **study programs** (code) which aim to identify problems in Software;
- We **study programmers** (humans) which aim to identify problems in the process of developing Software;
- We **develop tools for programs** (code) aimed directly at improving the quality of Software; and
- We **develop tools for programmers** (humans) aimed indirectly at improving the quality of Software.

// selected projects

- **REIDENT**: Assessment of Reidentification Risks with Bayesian Probabilistic Programing (Villum Foundation)
- **INSIGHT**: Program Repair with Static Insights (DFF)
- **ROSIN**: ROS-Industrial Quality Assured Robot Software Components (H2020)
- **VARIETE**: Variability in Portfolios of Dependable Systems (completed)
- **VARIYES**: Variability in Safety Critical Embedded Systems (completed)
- **MT-LAB**: Modeling of Information Technology (completed)
